Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	30 September 2026
Team ID	N\A
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Laptop Request Submission	Submit standard laptop request Enter employee/request details Select standard laptop requirement
FR-2	Automated Approval & Routing	Route request through Flow Designer Send approval task to IT Support Record approval or rejection
FR-3	Request Status Tracking	View request status Update status after workflow actions Provide request progress visibility
FR-4	Laptop Order Processing	Process approved laptop request Use standard laptop/catalog information Create and track procurement order
FR-5	Notifications & Updates	Notify employee about request/approval status Send processing updates Reduce repeated manual follow-up

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The request process should be simple, clear and easy for employees and IT support staff to use.
NFR-2	Security	Request and employee information should be protected with appropriate access controls and secure workflow handling.
NFR-3	Reliability	The workflow should process requests consistently and maintain accurate request and order records.
NFR-4	Performance	Requests, approvals and status updates should be processed without unnecessary delay.
NFR-5	Availability	The procurement workflow should be available when employees and IT support need to submit or process requests.
NFR-6	Scalability	The solution should support increasing numbers of standard laptop requests without major workflow changes.
