IDEATION PHASE
BRAINSTORM & IDEA PRIORITIZATION

Team ID	N\A
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Team Leader	uma Maheswari

Step 1: Team Gathering, Collaboration and Select the Problem Statement

The team discussed common challenges in IT procurement, especially the manual effort involved in processing standard laptop orders. The team identified the need to streamline the procurement process by automating repetitive activities using ServiceNow Flow Designer.

Problem Statement: Standard laptop procurement involves repetitive manual steps such as request processing, approval, task creation, and order handling. This can lead to delays and inconsistent processing. A Flow Designer-based automation can streamline these steps.

Step 2: Brainstorm, Idea Listing and Grouping

- Automate standard laptop order requests.
- Create an automated approval flow for laptop requests.
- Automatically generate procurement tasks after approval.
- Route requests to the appropriate team.
- Reduce manual effort and processing delays.

Step 3: Idea Prioritization

Priority	Idea	Priority Level
1	Automate standard laptop order workflow	High
2	Automate approval process	High
3	Automatically create procurement tasks	High
4	Route tasks to the appropriate team	Medium
5	Reduce manual processing effort	High

Project Focus: Use ServiceNow Flow Designer to automate the standard laptop procurement workflow.
