Project Design Phase
Problem – Solution Fit Template

Date	29 September 2026
Team ID	N/A
Project Name	Streamlining IT Procurement – Automating Standard Laptop Orders
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The project addresses delays and manual effort in standard laptop procurement. The proposed ServiceNow solution streamlines the request, validation, approval, procurement task creation and notification process through an automated workflow.

Purpose:

- Automate standard laptop requests and reduce repetitive manual processing.
- Make approval and procurement status visible to employees and IT teams.
- Reduce errors caused by incomplete requests and manual data entry.
- Create a consistent workflow for standard laptop procurement.
- Improve turnaround time and user experience through ServiceNow automation.

Template:

1. CUSTOMER SEGMENTS (CS) Primary: Employees requesting standard laptops. Secondary: IT procurement, IT support and approving managers.	**6. CUSTOMER CONSTRAINTS (CC)** Budget limits, approved laptop models, company procurement policies, approval hierarchy and required delivery timelines.	**5. AVAILABLE SOLUTIONS (AS)** Email/manual requests, spreadsheets and existing procurement tickets. These can involve repeated data entry and manual follow-up.
2. JOBS-TO-BE-DONE / PROBLEMS (JP) Employees need to request a standard laptop quickly and correctly. IT teams need to process requests consistently without repetitive manual work.	**9. PROBLEM ROOT CAUSE (RC)** Requests and approvals may be handled through disconnected/manual steps, causing incomplete information, repeated follow-ups and delays.	**7. BEHAVIOUR (BE)** Users submit requests, wait for approval, follow up on status and contact IT when updates are unclear. IT staff manually review and route requests.
3. TRIGGERS (TR) New employee onboarding, laptop replacement, damaged/old device, role change or need for an approved standard laptop.	**10. YOUR SOLUTION (SL)** ServiceNow catalog item + automated Flow Designer workflow for validation, approval, procurement task creation, status tracking and notifications.	**8. CHANNELS OF BEHAVIOUR (CH)** ServiceNow Service Catalog, employee portal/workspace, automated notifications and IT procurement task queues.
4. EMOTIONS: BEFORE / AFTER (EM) **Before:** confusion, waiting and repeated follow-ups. **After:** clearer process, visible status and fewer manual steps.
